

HOW TO SET UP A PARTNER NODE IN DXSPIDER

WITHOUT REGISTRATION OR PASSWORD

```
unset/badnode <partner_node>  
unset/lockout <partner_node>  
unset/isolate <partner_node>
```

```
set/[arcluster|clx|dxnet|node|spider] <partner_node>
```

Definition of the connection

```
nano /spider/connect/<partner_node>  
  
timeout 15  
connect telnet <address_partner_node> <port_partner_node>  
'login:' '<our_node_callsign>'
```

WITH REGISTRATION AND PASSWORD

```
unset/badnode <partner_node>  
unset/lockout <partner_node>  
unset/isolate <partner_node>
```

```
set/[arcluster|clx|dxnet|node|spider] <partner_node>
```

```
set/var $main::reqreg = 1  
set/var $main::passwdreq = 0
```

```
set/register <partner_node>  
set/password <partner_node> <password>
```

Definition of the connection

```
nano /spider/connect/<partner_node>  
  
timeout 15  
connect telnet <address_partner_node> <port_partner_node>  
'login:' '<our_node_callsign>'  
'assword:' '<password>'
```

Note

CCCluster to be defined as **set/spider**
AK1A to be defined as **set/node**
