

# Restoring the user DB (Mojo branch)

---

From the command line as **sysop** user:

Stopped service

```
sudo service dxspider stop
```

Change to the directory that contains the user backup: **user\_json**

```
cd /spider/local_data
```

Run regeneration of **users.v3j**

```
perl user_json
```

Start cluster service

```
sudo service dxspider start
```

---
