List of nodes for mobile use

Displays a list of connected nodes reporting:

```
Type of NODE
And the duration of the connection
```

This command has been created to be used from a mobile app. It is possible to use it from a terminal or from console.

It may be necessary to install the Date:Manip module.

```
# Debian or similar
apt install libdate-manip-perl
```

or

```
# Alternative
cpanm install Date:Manip
```

The script is called **mnode.pl**

Using the sysop user, it has to be copied to:

```
/spider/local_cmd
```

To run it use

```
mnode
```

or

```
mn
```

The output would look something like this example:

```
List of connected Nodes:

Callsign  R P  Type       Connection Time
--------  - -  ---------  ---------------
AE5E           NODE DXSP  9 d    1 h  37 m
EA2CW-2   R P  NODE DXSP  0 d    7 h  28 m
EA2RCF-5  R P  NODE DXSP  3 d  19 h  46 m
EA3CV-2        NODE DXSP  9 d    8 h  50 m
EA4URE-5  R P  NODE DXSP  9 d    8 h  37 m
F4EYQ-1   R P  NODE DXSP  3 d    5 h  32 m
IW9EDP-6  R P  NODE DXSP  2 d    4 h  27 m

  Nodes:  7
```

It can be downloaded at [1] (https://raw.githubusercontent.com/EA3CV/dxspider_info/main/mnodes.pl)
